

■ SAAS · ENTERPRISE SOFTWARE

Univo

One business system for finance, CRM, people, projects and approvals — for every entity, in English and Arabic.

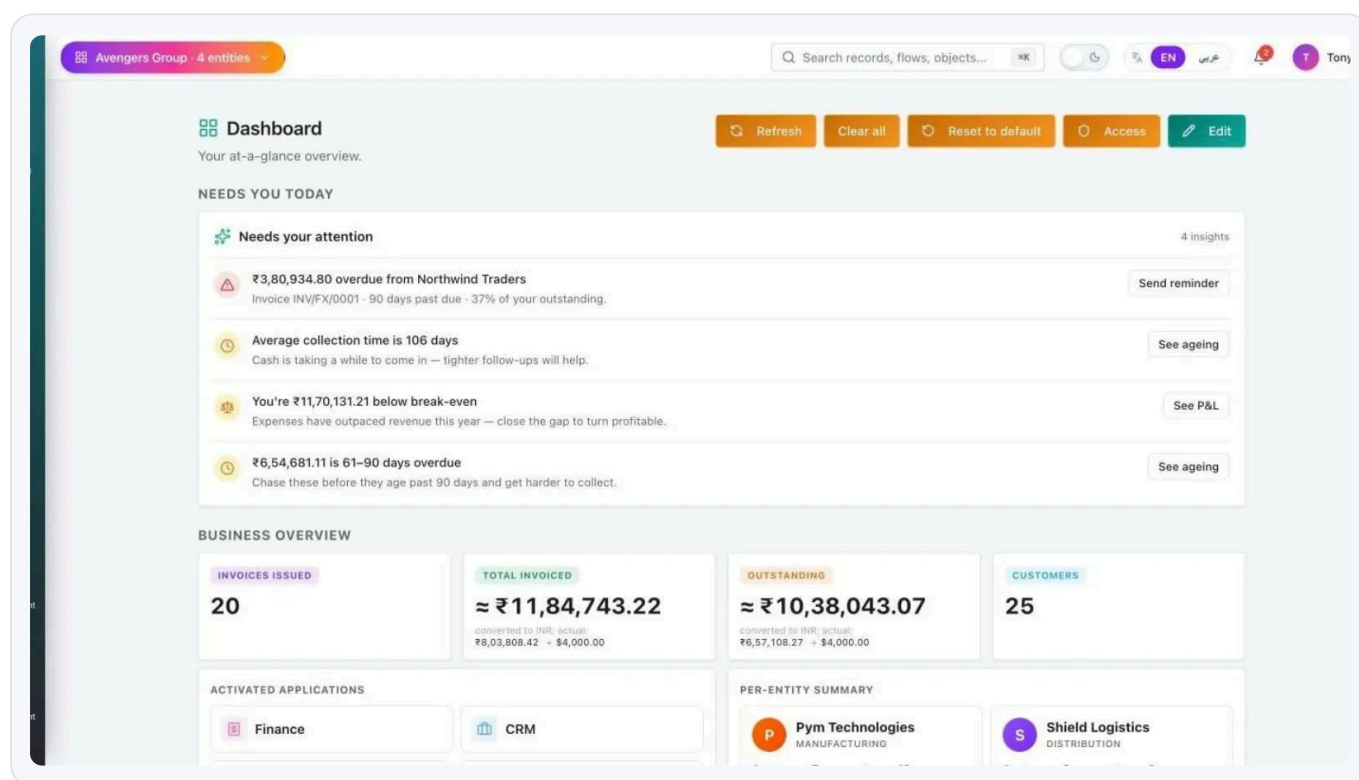

Ten modules

Multi-entity

English and Arabic

No-code Creator

Hosted or on-premise

Needs your attention, worked out: overdue invoices, slow collections and the gap to break-even, each with a next step. Sample tenant with four entities.

01

One data model

CRM, finance, procurement, inventory, HR and projects share the same customers, items and transactions.

02

Every entity, one system

Each company keeps its own books, with consolidated finance across the group.

03

Configured, not customised

The business sets its own fields, statuses, pipelines and approvals — without code.

THE PROBLEMS IT SOLVES

Where growing businesses lose time and control — and how Univo handles it.

PROBLEM

Customer, finance and stock data live in separate spreadsheets and tools.

Univo: one data model. Nothing is keyed in twice.

PROBLEM

Group companies consolidate their accounts by hand at month end.

Univo: multi-entity by design, with consolidated finance, VAT invoicing, WPS payroll and IFRS-aligned reporting.

PROBLEM

Approvals happen over email and chat, with no record of who agreed.

Univo: conditional, multi-tier approvals on any record, with the full history kept.

PROBLEM

Every new process needs a change request to the software vendor.

Univo: no-code and low-code configuration, in English and Arabic.

MODULES

CRM

Customers and sales workflows

Finance

Invoicing and financial reporting

Procurement

Purchasing operations

Inventory

Stock management

People

HR and payroll

Projects

Project management

Approvals

Business approval workflows

Multi-entity

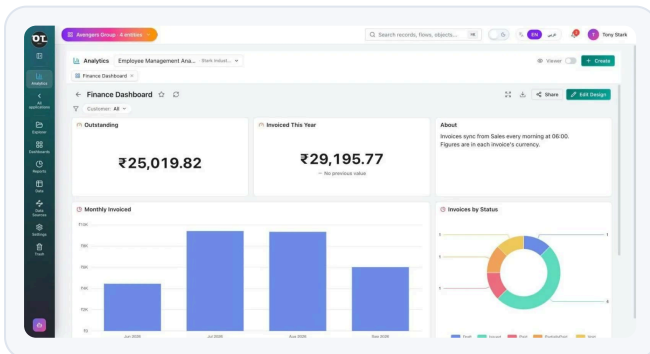

Operations across entities

Creator

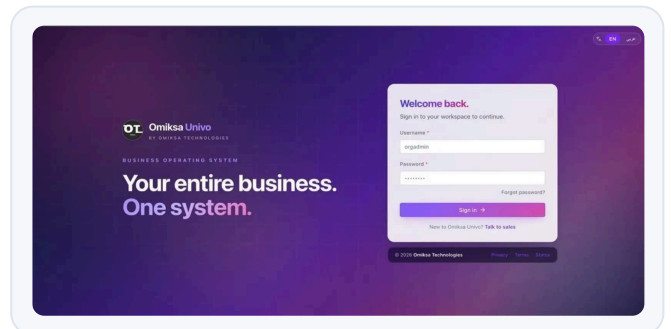

No-code and low-code apps

Analytics

Dashboards on live records

Finance dashboards with filters, charts and sharing, built in Univo Analytics.

Hosted SaaS, or a single-tenant environment on your infrastructure.

BUILT FOR THE REGION

Regional requirements, handled as standard.

- ✓ **VAT invoicing** and tax-ready reporting.
- ✓ **WPS payroll** for UAE salary processing.
- ✓ **IFRS-aligned** financial reporting across entities.
- ✓ **English and Arabic** interfaces, including right-to-left layouts.
- ✓ **Four-eyes approvals**, separated roles and a full change history on every record.

DEPLOYMENT

Hosted SaaS

We run it for you, with monitoring, backups and uptime targets.

Single-tenant, on your infrastructure

Your cloud or your servers. Your data stays yours.

Governed AI agents

The AI Agent Suite works on top of Univo, with a named approval on every change.

HOW WE DELIVER

Discover

Workshops and a scope both sides sign off.

Build

Configuration sprints with working demos.

Deploy

Data migration, training and go-live support.

Host

Monitoring, backups and uptime targets.

Maintain

Upgrades and enhancements on a support plan.

LICENSING

Modular — license only the modules the business needs, and add more as it grows.

PRINCIPAL-LED

The architect who scopes the engagement stays accountable for delivery.

PROOF FIRST

Start with a workshop or a pilot against agreed success measures.

GET IN TOUCH

Let's talk about your requirements.

Share the pipeline, scope one priority in a workshop, or run a proof of concept against agreed success measures.
